

# STEPHEN ORAM

## BIOHACKED & BEGGING

### Key selling points

- A collection of thought-provoking short stories from science-fiction author Stephen Oram.
- The follow-up to the intriguing *Eating Robots and Other Stories*, hailed by *Morning Star* as one of the top radical works of fiction in 2017.
- With sharpness and wit, these sci-fi shorts will grab your imagination and refuse to let go.

### About the book

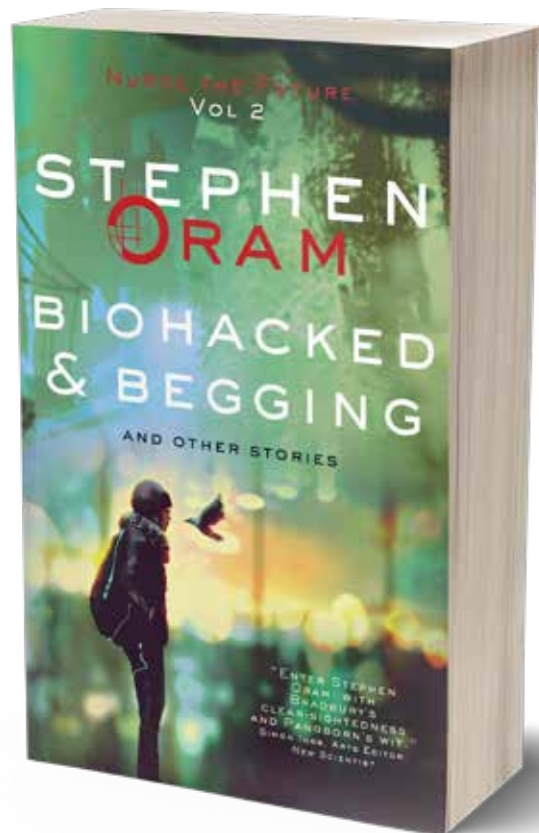

Immerse yourself in the future of biohacking and implants, genetic modification, blockchain micro-transactions and futuristic dating-apps.

Prodding and poking the possible in volume 2 of *Nudge the Future*, Oram starts with another flash fiction foray into the world of Unified Sentience and ends with virtual reality for babies and biohacked fish.

“There’s a distinct flavour of literary Martianism to *Biohacked & Begging*. With the eye of a visitor from an alien planet, Oram sees what few other SF writers see...”  
Dan O’Hara, editor of *Extreme Metaphors: Selected Interviews with J. G. Ballard, 1967–2008*

### About the author

Stephen Oram writes social science fiction and is lead curator for near-future fiction at Virtual Futures. He enjoys working collaboratively with scientists and future-tech people – they do the science he does the fiction. He is published in several anthologies and has two published novels, *Quantum Confessions* and *Fluence*.

## The future is ours and it’s up for grabs...
