About the book

Had enough of meetings where it's all you can do to get through them? Want to bring more impact to your presentations, and enjoy them more? And what if you could stop the overload of information you and your colleagues put up with every day?

If you're happy to think a little differently, and stop being a corporate robot, this book's for you.

Kill The Robot invites you to start thinking more independently about your communication. In a handful of short, punchy chapters, we'll explore half a dozen provocative communication principles which can make everything different.

So, if you want to be more of an individual again, enjoy making presentations or make meetings more productive, let's get on...

About the author
